Monday, 30 September, 2013

D. HUYGE. — Welcome Address ......................................................... 9
J. RAMMELOO. — Is the World facing a Global Food Crisis? And Africa? Setting the Scene. An Introduction to the Conference .. 11

Human Aspects

C. LINARD et al. — Estimating the Number of Malnourished Children in the Democratic Republic of the Congo: Potential from the AfriPop and CEDAT Databases. .......................... 23

Physical Aspects

M. NGONGO LUHEMBWE et al. — Soil Resources in the Congo Basin: their Properties and Constraints for Food Production .......... 35
E. DUCHEYNE et al. — Remote Sensing: a Key Tool for Monitoring Food Resources in a Changing World. ................................. 55

POSTERS*
G. BAERT et al. — Legacy Soil Survey Data of DR Congo .......... 67
A. VERDOODT et al. — Design of a Soil Information System for DR Congo ................................................................. 69
Y.-D. BOTULA et al. — Pedotransfer Functions: an Answer to the Lack of Hydrophysical Soil Properties for Sustainable Land Management in the South-Western Part of the Congo Basin. .... 71
Agricultural Economics

L. D’HAESSE et al. — Food Security in the Democratic Republic of Congo ................................................. 75

POSTERS
W. MARIVOET. — Food Markets and People’s Nutrition in the DRC (2004-5) ........................................... 93
J. MULUMUNA-WA-LOLA et al. — Understanding Major Determinants for Fertilizer Use in South Kivu, DR Congo. ........................................... 95

Biological Aspects

R. NASI et al. — Conservation and Utilization of Wildlife in the Congo Basin: How to tackle the Protein Gap? ........................................... 99

POSTERS
S. DIBALUKA MPULUSU et al. — Edible Mushrooms of Kimvula City in Lower Congo (DR Congo) ........................................... 103
S. DIBALUKA MPULUSU et al. — Edible Lignicolous Mushroom Cultivation of Kimvula City in Lower Congo (DR Congo) ........................................... 105
S. T. NDOLO EBIPA et al. — Safeguarding Traditional Knowledge of Wild Edible Plants and Mushrooms in Bayaka Communities (Republic of Congo) ........................................... 107
C. TERMOTE & P. VAN DAMME. — Wild Edible Plant Use in Tshopo District, DR Congo ........................................... 109
M. I. HABUMUGISHA HINITIMA et al. — Valorization of the Indigenous Knowledge of the Melliferous Plants in the Vicinity of the Virunga National Park (DRC) to contribute to an Enhancement of its Conservation ........................................... 111
M. LOUETTE. — Birds as Food in Africa: Some Reflections ........................................... 113
R. MBETE et al. — Bushmeat Consumption in Households from Brazzaville, Republic of Congo ........................................... 115

Tuesday, 1 October, 2013

E. FRISON. — Agricultural Biodiversity: a Crucial Asset for Food and Nutrition Security ........................................... 117
N. VERBRUGGEN. — Food Production and Plant Genetic Engineering in Developing Countries ........................................... 119
